

FT-1000D Conversion and Frequency Generation

K9MA
21 March, 2002

Important Notes:

1. Drawings show only those elements essential to the frequency generation and conversion scheme.
2. The Local Unit Block Diagram is derived from the drawing in the Yaesu Technical Supplement. The others, as far as I know, do not exist in Yaesu's documentation, and were derived largely from the schematics.
3. LO5, BFO, and Carrier Oscillator are my own designations. The others come from Yaesu documentation.
4. While I have made every effort to be accurate, I make no guarantee. Please let me know of any errors found.
